int main() {
    int n;
    // Read the number of elements
    if (scanf("%d", &n) != 1) return 0;

    // Use a frequency tracker array initialized to 0
    int *count = (int *)calloc(n + 1, sizeof(int));
    if (count == NULL) return 1;

    int duplicate = -1;

    // Read n elements
    for (int i = 0; i < n; i++) {
