State	Finished
Completed on	Friday, 7 August 2026, 11:10 PM
Time taken	2 mins 45 secs
Marks	1.00/1.00
Grade	**10.00** out of 10.00 (**100**%)

Question 1 | Correct Mark 1.00 out of 1.00

Convert the following algorithm into a program and find its time complexity using the counter method.

```
void function (int n)
{
    int i= 1;
```

```
    int s =1;
```

```
    while(s <= n)
    {
         i++;
         s += i;
     }
}
```

Note: No need of counter increment for declarations and scanf() and count variable printf() statements.

Input:

A positive Integer n

Output:

Print the value of the counter variable

For example:

Input	Result
9	12

Answer: (penalty regime: 0 %)

```
#include <stdio.h>
int main(){
    void function(int n){
        int i=1;
        int s=1;
        int c=0;
        c=c+2;
        while(s<=n){
            c++;
            i++;
            c++;
            s+=i;
            c++;
        }
        c++;
        printf("%d",c);
    }
    int n;
    scanf("%d",&n);
    function(n);
}
```

	Input	Expected	Got	
✔	9	12	12	✔
✔	4	9	9	✔

Passed all tests! ✔

Correct

Marks for this submission: 1.00/1.00.
